General Comment:As a result of the current economic crisis, the role of corporates in the credit union sector should be reevaluated. An important issue that needs to be resolved is that of the current risk factors. Currently, corporates compete with each other, offering higher rates through markability risks. Thus, the NCUA should return to defined fields of membership (state or regional) in order to prevent risk and competition. In addition, payment system services should be isolated because risks paired with other businesses and services would then be prevented as well.
