

2016 NCUA National Exam Program Training

Location: Denver, Colorado

Dates: April 4 – 15, 2016

Conference Costs: \$1,783,000

Participants: 954

The training provided staff with a skills development program that included wide-ranging sessions on cyber security, member-business lending, managing examinations, interest-rate risk, and consumer protection issues. In addition, attendees received training in workplace violence and security awareness, workplace diversity and recognizing everyday biases. They also heard from leading experts on emerging trends in cybercrime.

This biennial training was approved by the Executive Director and is critical to the professional development of credit union examiners to keep pace with changes in the industry and technology, and to provide credit unions and their members with high-quality service. This training benefits credit unions because it helps makes the examination process itself work more efficiently. Since NCUA's staff are based across the country, the central location makes the training process more efficient and cost-effective as well as provides opportunities to share ideas and learn from peers.
